

# SCRAPPA™

BULK HANDLING SOLUTIONS

MAXIMUM CONTAINER  
PROTECTION AND  
EFFICIENT LOADING

BEYOND INNOVATION >>

# A-WARD™

## WHY THE SCRAPPA™?

**MAXIMUM CONTAINER PROTECTION, THE SCRAPPA ALLOWS YOU TO FILL UP EVERY LAST INCH FASTER, REDUCING FREIGHT, LABOUR AND HANDLING COSTS.**

### Side, rear and top container wall protection

Our side, top compression system, and rear brace are designed to support your container during the loading process to ensure maximum container protection and to avoid expensive damage.

### Faster and more competitive

With a fast loading cycle, the SCRAPPA allows you to turn around high volumes of scrap metal and take advantage of favourable shifts in exchange rates or international pricing.

### Engineered for safety

We design our machines with the operator in mind.

### Smaller footprint, greater capacity

Fill your container using 100% of the internal container volume, moving more materials using less transportation trailers and saving on freight.

### Accurate weighing

Load your container right up to the maximum allowed weight using the SCRAPPA built in scale, so you only have to load once.

### Buy once, buy the best

Our machines are built to last. Clever design and engineering combined with the toughest construction means your investment will require minimal servicing and will deliver a high return on investment.

### ACCURATE BUILT IN SCALE:

Monitor the container weight in real time.

### LOAD IN MINUTES NOT HOURS:

30 minutes average loading time per container.

### INCREASED CONTAINER PROTECTION:

Avoid expensive container damage.

### INCREASE PROFITS:

Through faster circulation of stock.

We're global! So no matter where you are, we're nearby.

**A-WARD™**

### RADIO REMOTE CONTROL

Built tough, for safe, fast single operator loading and unloading control. Plus real time display feature.

### HYDRAULIC CONTAINER DOOR CLOSERS

Remotely controlled door arms for safety and speed.

### ACCESS LADDER AND PLATFORM

Benefits in load checking or adjusting prior to sealing doors. Safe access to the top of the container when tilted to 90-degrees.

### TOP COMPRESSION

The top compression system is designed to support your container during the loading process to ensure maximum container protection.

## FEATURES AND ADD ON OPTIONS

### DIGITAL WEIGHING SCALE SYSTEM

The +/-1% weight accuracy of the A-Ward scale system minimizes adjusting loads. Works best when combined with the Radio Remote Control.

### MOUNTED CAMERA

Remote controlled, the mounted camera provides quick capture of the container interior.

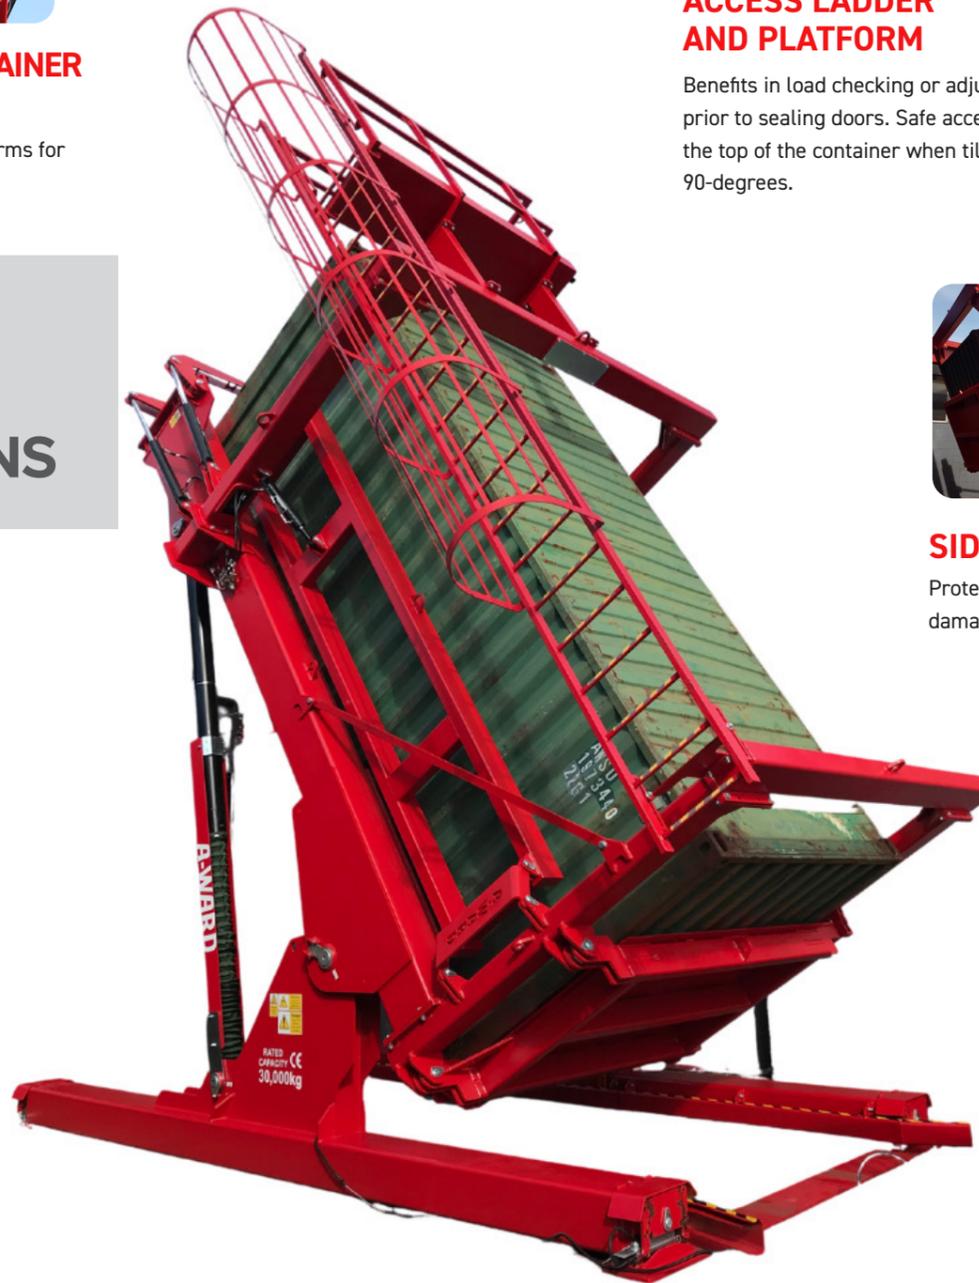

### TRANSPORTATION KIT

Quick and easy transportation of your tilter to minimize downtime. Simply condense, lift and lock.

### COLLAPSABLE SCRAPPA

Easily collapsed for compact and efficient transportation.

### SIDE COMPRESSION

Protect your container side walls from damage caused by heavy scrap.

### REAR SUPPORT BRACE

Avoid expensive container damage during the loading process. The support brace and gate protects the rear wall of the container.

### ELECTRIC OR DIESEL POWER PACKS

The A-Ward Electric Power Pack is emissions-free and very low maintenance. The A-Ward Diesel Power Pack offers the benefit of portability for businesses intending to move their tilter around the site or to different sites.

## WE ASKED:

“Why can't we use gravity to turn wasted space and labour into extra time and money?”

## WE INVENTED:

THE SCRAPPA. Fills up every last inch in minutes, making every shipment more profitable.

“ We've had a great experience from the sales, design, engineering team and all the way to service and parts. A great company to work with. We always recommend them to anyone who needs a container tilter designed with state of the art technology. The product material is high quality and very easy to use. ”

Abdullah A. - Managing Director  
Premier Metal Recyclers
